OBJECTIVE

Aspiring iOS developer excited to create useful and easy-to-use apps with Swift and SwiftUI. Committed to writing clean and well-organized code, learning new skills, and improving every day. Looking forward to contributing to projects that provide a smooth and enjoyable experience for users.

EXPERIENCE

Flutter Intern, Goporgs

September 2024 – December 2024

- Implemented Riverpod for efficient state management, improving performance and code structure.
- Integrated Firebase (Auth, Firestore, Storage) for real-time data and backend functionality.
- Developed scalable Flutter apps in collaboration with team members using Firebase and Riverpod.
- Optimized app performance and state management in complex Flutter projects.

PROJECTS :

DIU Routine

Developed a mobile app to streamline access to DIU university class schedules for students and teacher reducing manual search time from minutes to seconds.

- Enabled students to search routines by section and teachers by initials, empty rooms showing.
- Backend: Laravel API with SQLite persistence and Java services for PDF parsing.
- Frontend: Swift, SwiftUI, SwiftData, PDFkit, UserNotification and much more.

GradeX

An intuitive iOS application designed to help university students calculate and manage their CGPA effortlessly.

- Calculate and manage multiple CGPA profiles with accurate GPA and credit inputs.
- Visualize academic progress through interactive graphs and detailed analytics.
- Securely store, export, and share complete results as PDF reports using SwiftData.

Tech Stack: Swift, SwiftUI, SwiftData, Native iOS PDF Rendering
